

This week

Our highlights of the week included entering the space dome – we remembered a lot of learning from when we studied Earth, Sun and Moon at the beginning of the year!

We also took part in a teeth workshop to help us write our Non-chronological reports.

Furthermore, we loved practising our archery skills and last but not least, taking part in the big electric pedal!

A special mention to our **Proud Cloud**, Jackson, for massively improving his handwriting and showing determination to aim high for that pen license!

Our **Fine Diner** award this week goes to Christian. The children voted for him because he always has good manners and welcomes other children to sit with him.

We hope you all have a relaxing

weekend! 😊

Friday 10th March

Pre learning

This week's pre learning/ pre viewing is: Measuring angles - Please talk to your child about how we measure angles using protractors. Show them how the numbers work on a protractor and maybe practise measuring some angles!

Maths and English

This week in maths the children have been solving problems on how to find the volume and measuring in millilitres and litres as well as finding the capacity of a 3D shape. The children understand the difference between the two and solved some tricky word problems in the process!

In English this week we wrote our own non-chronological reports about teeth. With the help of the science workshop, books and websites we were able to research lots of information about teeth to create a plan for our report. We then independently used our plans to write a full information report to teach people all about teeth!

Reading Daily

A plea goes out to parents and carers to ensure your child is reading at home daily. With Mrs Bird sadly having left last week and with Mrs Foster away for this half term, I will be encouraging the children to be even more independent than ever. This will mean that THEY are responsible for changing their book when they need to until further notice.

Thank you in advance for your support and patience during this time.

Scientist of the week

A big well done to our **scientists** of the week; Mylo, Zak and Luca! Our super keen scientists in the teeth workshop as well as being very knowledgeable in our lesson on gravity!

Next Week – Spanish fun!

Next week we are having lots of fun by taking two whole days to focus on our topic of Spain as part of Europe. The projects will involve making piñatas, cooking tapas, researching Spanish artists and playing Spanish games!
